

NewsLens AI – Official User Manual

Version 1.3 | Last Updated: July 2026

1. Overview

Welcome to NewsLens AI, an intelligent news aggregation platform designed to deliver curated content with advanced AI-driven features. This manual outlines the application's structure, access protocols, user roles, and navigation rules to ensure a seamless experience.

2. Getting Started: Authentication & Access

2.1 Login & Registration

- The Login and Registration pages are publicly accessible.
- New users must complete the registration form to create an account. Existing users can log in using their registered credentials.

2.2 Protected Pages (Authentication Required)

The following sections are restricted and require a valid user session:

- Profile Page (User account management)
- AI Features Page (Core AI-powered news tools)

Note: Any attempt to access these protected pages without an active session will trigger an automatic redirect to the "Get Started" (Login) page.

3. Home Page Layout

Upon accessing the application, the Home Page serves as the default landing interface. It is structured into the following core components:

- **Sidebar Navigation:** Provides quick links to the main sections (Home, AI Features, Profile, and Logout).
 - **Main Content Area:** Displays the latest news feed.
 - **Control Elements:** Interactive buttons and toggles for filtering content, refreshing feeds, and managing user preferences.
-

4. Feature Pages: Profile & AI Tools

4.1 Profile Page

- Allows users to view and edit personal account settings.
- Accessible only after successful authentication.

4.2 AI Features Page

- The central hub for intelligent news processing and insights.
- **Access Restriction:** This page is strictly protected. Unauthenticated users are redirected to the Login page.

4.2.1 User Role & Permissions

- **Standard Users:** Upon login, standard users have access to the most recent 10 news articles within the AI Features section.
 - **Administrators (Admin):** Users with administrative privileges have an enhanced capability. In addition to viewing the existing feed, admins are granted a dedicated control to load and import new news directly into the system via the AI Features page.
-

5. Backend Activation (Wake-Up Feature)

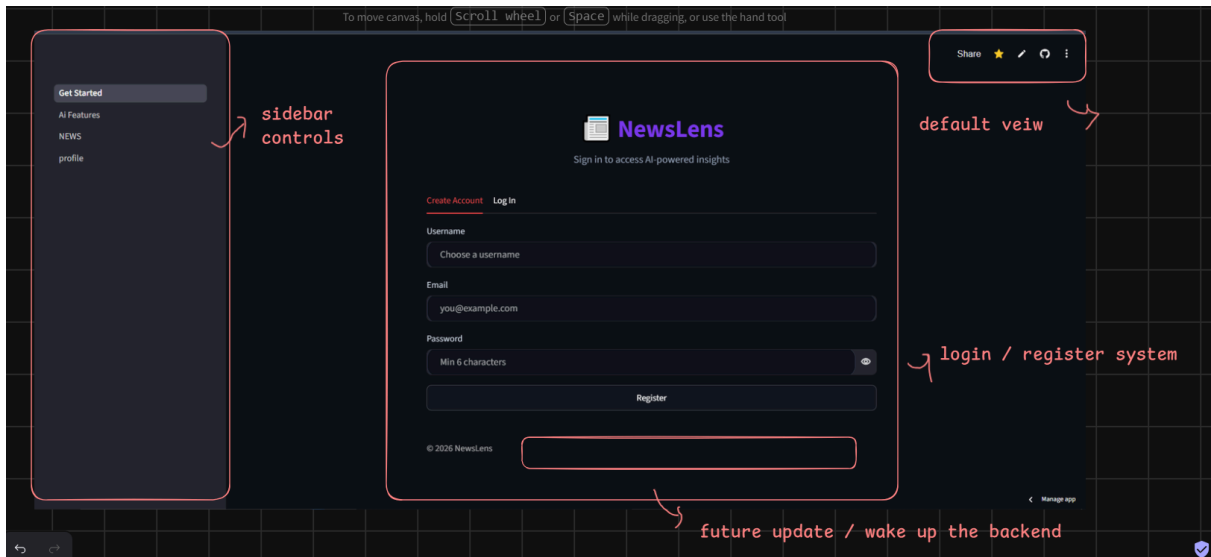

To optimize server resources, the application's backend services may enter an idle state during periods of inactivity.

- A prominent "Wake Up the Backend" prompt is displayed within a designated box at the bottom of the interface.
- Clicking this button reactivates the server-side processes, fully re-enabling all dynamic features and data fetching capabilities for the user.

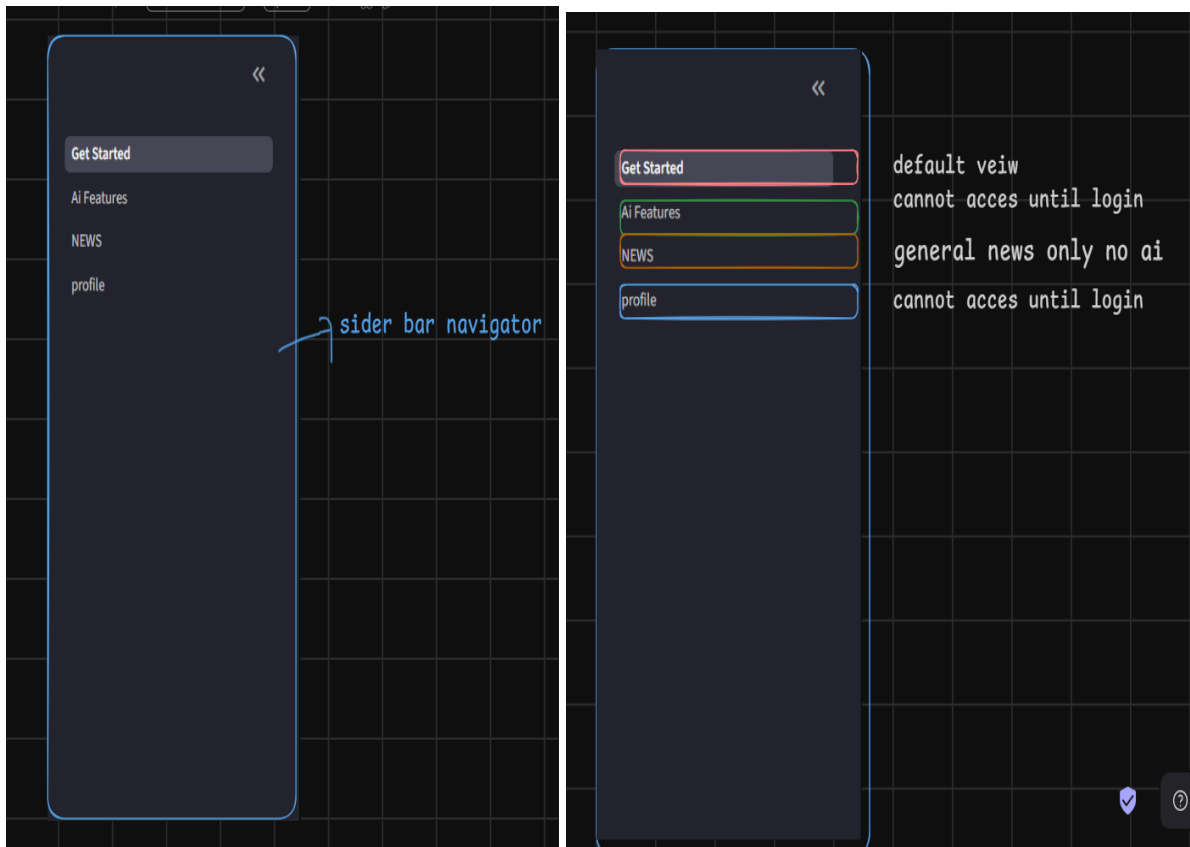

6. Navigation Rules & Session Management

To maintain logical user flow and data security, the following navigation rules are strictly enforced:

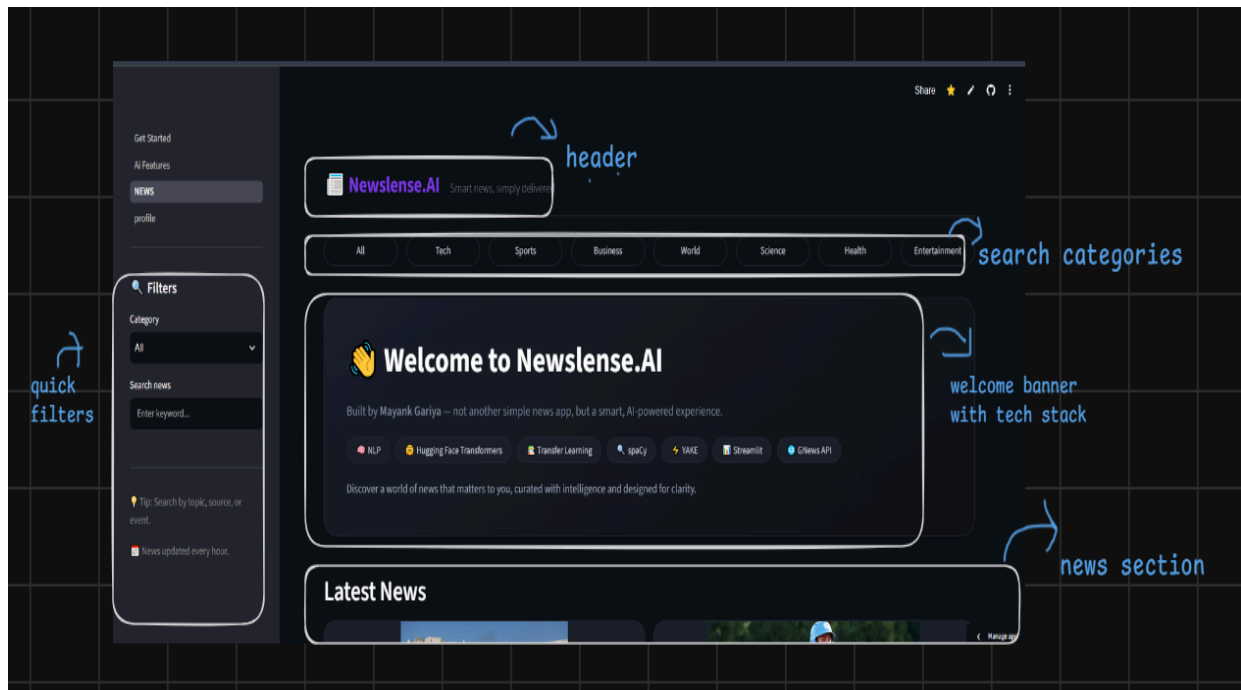

Action	Result / Behavior
Accessing AI/Profile while logged out	Automatically redirected to the "Get Started" (Login) page.
Accessing "Get Started" while logged in	Redirected away from the Login page. The "Get Started" page becomes inaccessible until the user explicitly logs out.
Logging Out	Terminates the active session and redirects the user to the public "Get Started" page.

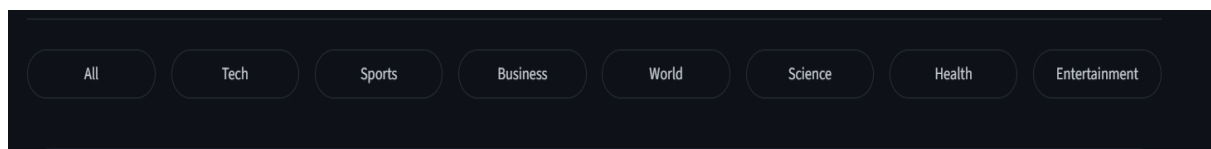

Navigations :

News section :

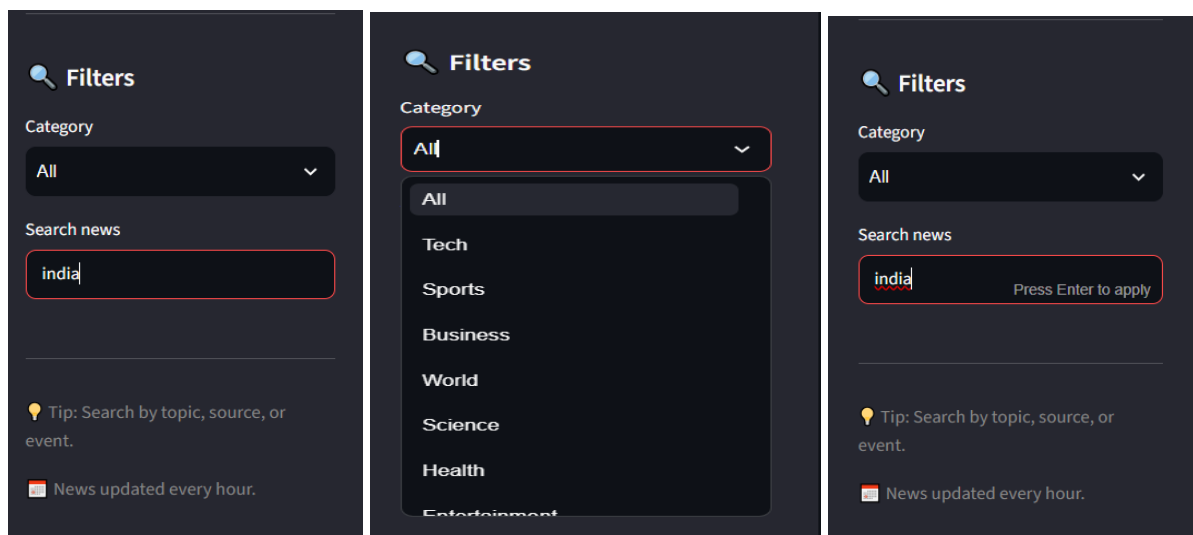

A comprehensive list of news categories is available, allowing you to easily toggle between them to filter and view stories relevant to your specific interests.

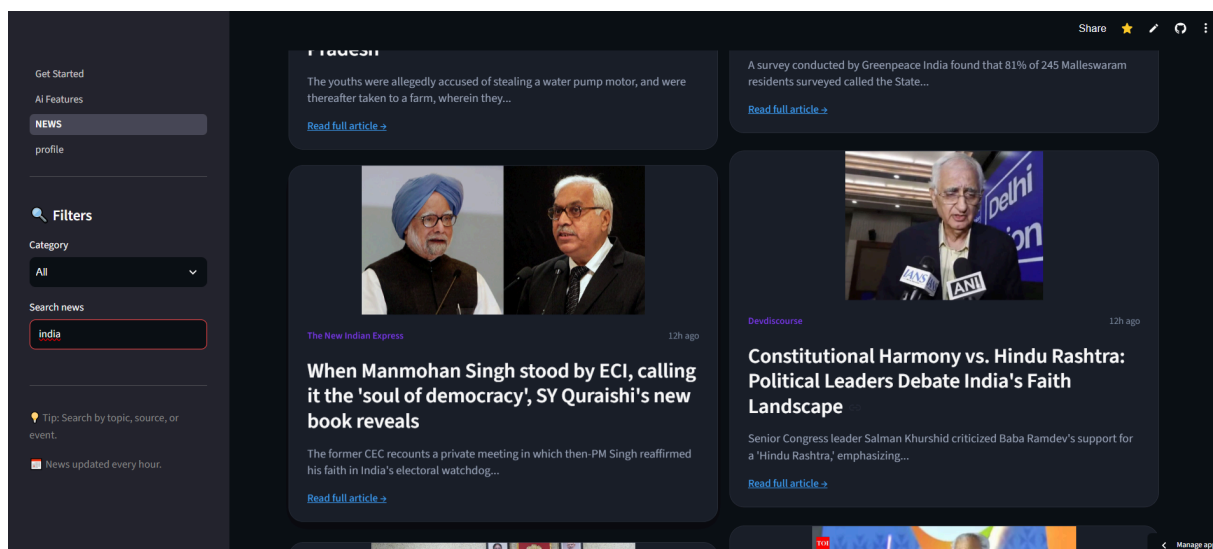

How to Use Filters:

The filtering system allows you to narrow down news articles based on categories or specific keywords. Follow these steps:

1. Locate the left panel on the Home page.
2. Click on the "All" dropdown menu to reveal the full list of available categories.
3. Select your preferred category to instantly refresh the feed with relevant stories.
4. For a more targeted search, enter a keyword (e.g., *India*) into the text box positioned directly below the dropdown, and press enter to view matching results.

Step-by-Step Walkthrough

Login & Registration Process

To access the protected features of NewsLens AI, you must first authenticate. Follow the steps below:

Step 1: Navigate to the Get Started Page

Begin by visiting the public "Get Started" page, which serves as the gateway for both new and returning users.

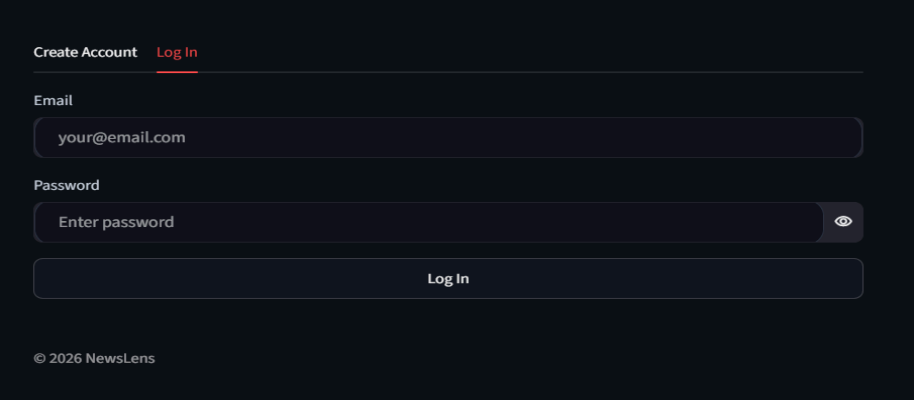

A screenshot of the NewsLens registration interface. At the top center is the NewsLens logo, consisting of a newspaper icon and the text "NewsLens". Below the logo is the tagline "Sign in to access AI-powered insights". There are two tabs: "Create Account" (highlighted with a red underline) and "Log In". The "Create Account" form includes three input fields: "Username" with a placeholder "Choose a username", "Email" with a placeholder "you@example.com", and "Password" with a placeholder "Min 6 characters" and a toggle icon. A "Register" button is positioned below the password field. At the bottom left, the copyright notice "© 2026 NewsLens" is visible.

Step 2: Create Your Account (New Users)

- Click on the "Create Account" tab to register.
- Enter the following details:
 - Username: Choose a display name (this can be modified later in your Profile section).
 - Email Address: This serves as your unique identifier for login.
 - Password: Create a secure password—please remember it, as it cannot be recovered through the app directly.
- Submit the registration form to complete sign-up.

Step 3: Log In to Your Account

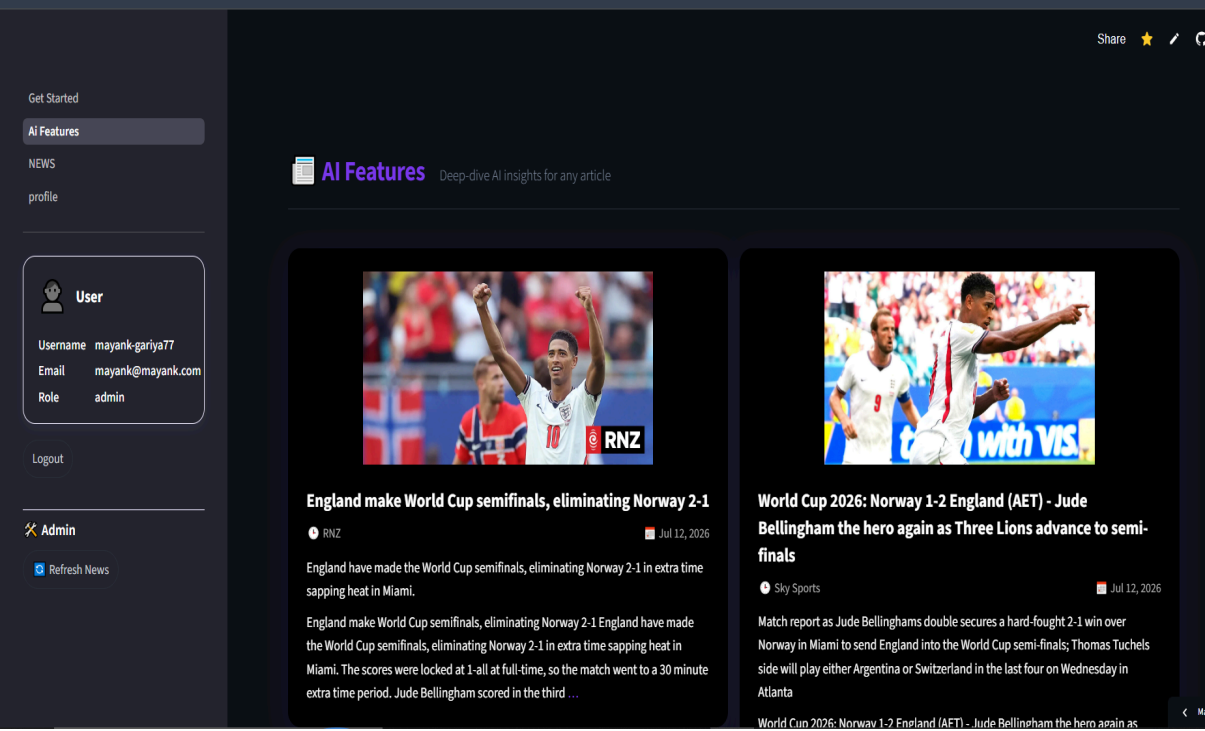

- After registration, switch to the "Login" tab (located adjacent to the "Create Account" section).
- Enter your registered Email and Password.
- Click the login button to proceed.

The login form is displayed on a dark background. At the top, there are two tabs: "Create Account" and "Log In", with "Log In" being the active tab. Below the tabs, there are two input fields: "Email" and "Password". The "Email" field contains the text "your@email.com". The "Password" field contains the text "Enter password" and has a toggle icon (an eye) to its right. Below the input fields is a "Log In" button. At the bottom left, there is a copyright notice: "© 2026 NewsLens".

Step 4: Access the Application

Upon successful authentication, you will be automatically redirected to the AI Features page, where you can begin exploring the platform's core tools.

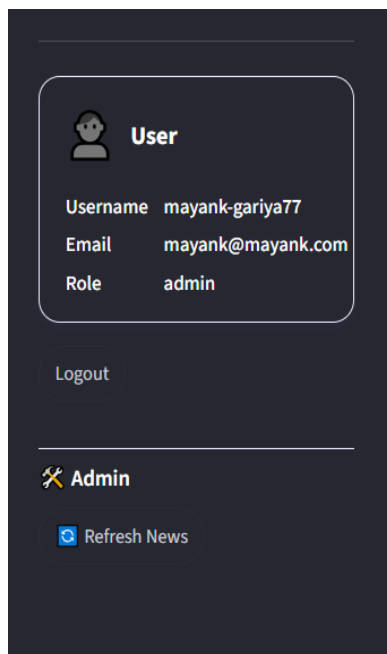

The AI Features page is displayed on a dark background. On the left side, there is a sidebar with the following elements: "Get Started", "AI Features" (highlighted), "NEWS", "profile", a user profile card for "User" (mayank-gariya77, mayank@mayank.com, admin role), "Logout", "Admin" (with a "Refresh News" button), and a "Share" button at the top right. The main content area features a header "AI Features" with the subtitle "Deep-dive AI insights for any article". Below the header, there are two article cards. The first card, titled "England make World Cup semifinals, eliminating Norway 2-1", features a photo of Jude Bellingham celebrating and is attributed to "RNZ" with a date of "Jul 12, 2026". The second card, titled "World Cup 2026: Norway 1-2 England (AET) - Jude Bellingham the hero again as Three Lions advance to semi-finals", features a photo of Jude Bellingham and is attributed to "Sky Sports" with a date of "Jul 12, 2026".

Step 5: Identify Your Role & Profile

Once logged in, look to the top-left corner of the interface. Here, you will find:

- Your short profile avatar/name.
- Your assigned role (displayed clearly).

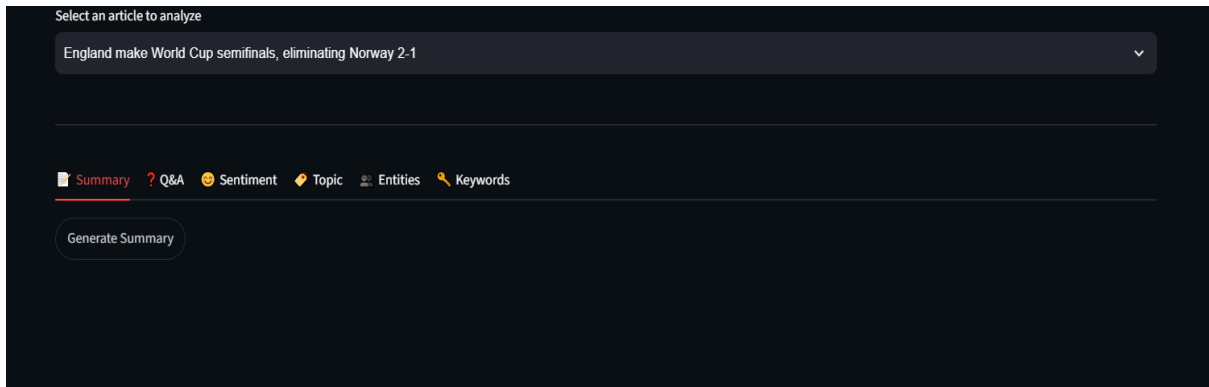

Note on Roles: By default, every new user is assigned the "User" role. Only the system administrator has the authority to upgrade an account to "Admin" status. Admin users are distinguished by an additional refresh/load news button on the AI Features page, granting them the exclusive ability to fetch and load new news into the system

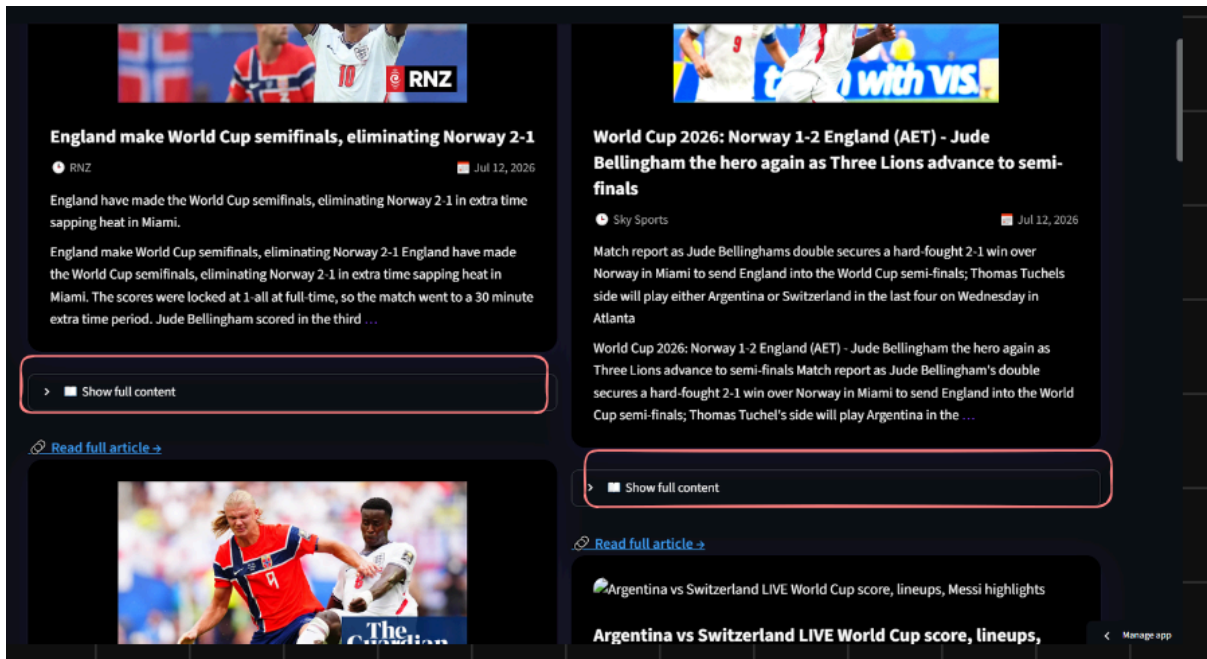

AI Tools & Verification Workflow

The AI Features page is designed with a clear two-step workflow:

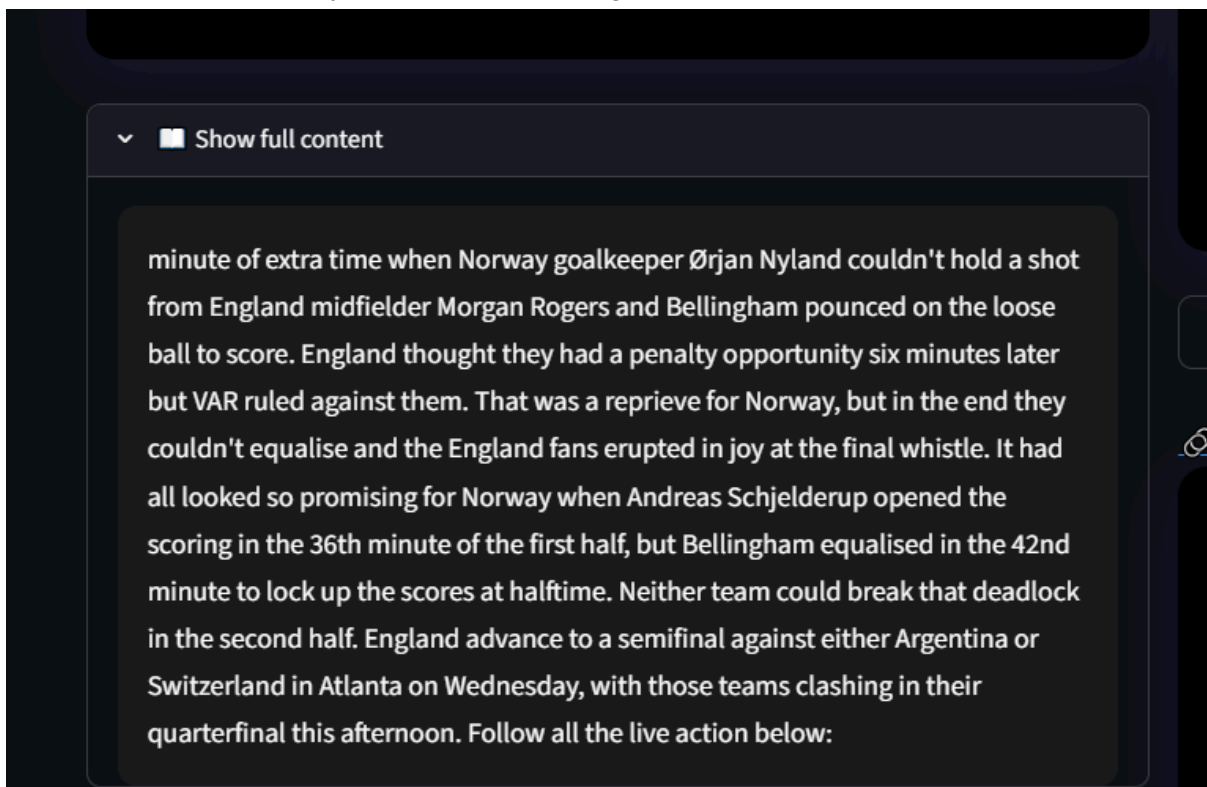

- **Top Dropdown (Article Selection):** Located at the top of the AI tools section, this dropdown contains the 10 most recent articles. Selecting one populates the page with that news story and activates the AI analysis features for it.

- Bottom Dropdown (Source Verification): Located beneath each article's AI-processed output, this dropdown provides a crucial fact-checking tool. Clicking it reveals a link to the full original news article, so you can read the detailed report and verify the AI-generated results against the primary source.

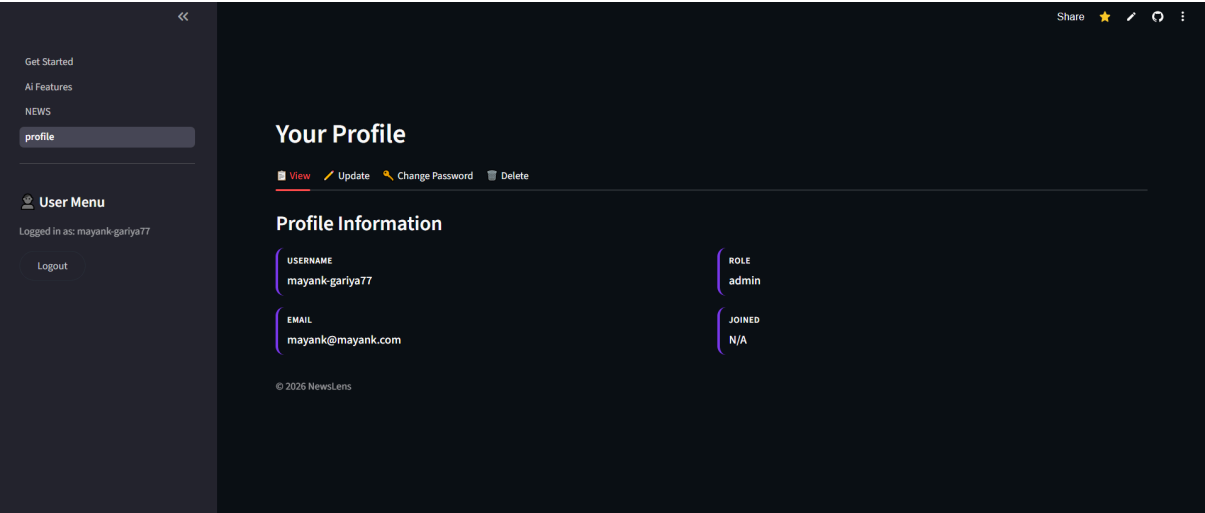

Hit show full content and you will see something like this :

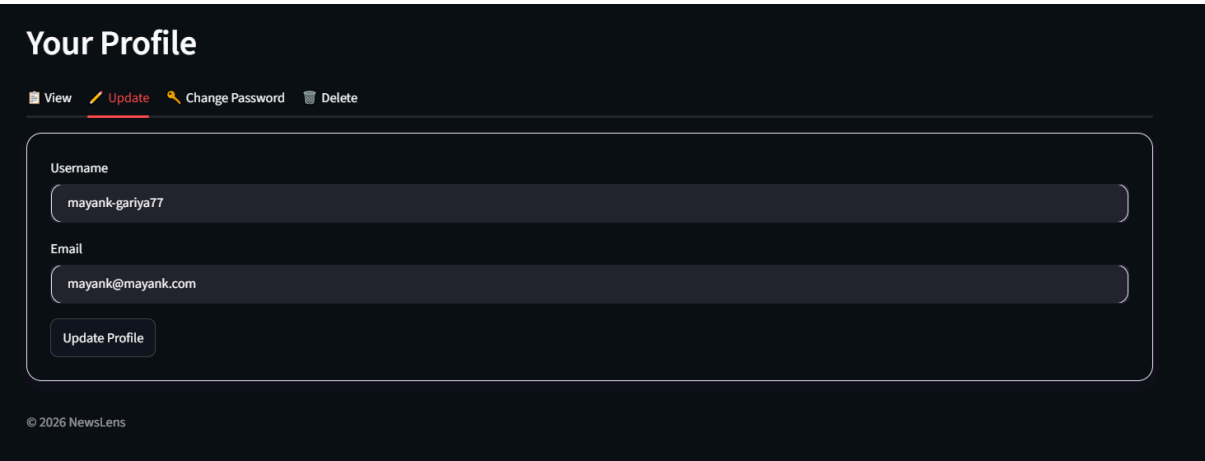

Go down and use the ai features by your self

- NOTE : On the left there is logout button as soon as you click that you will be log out

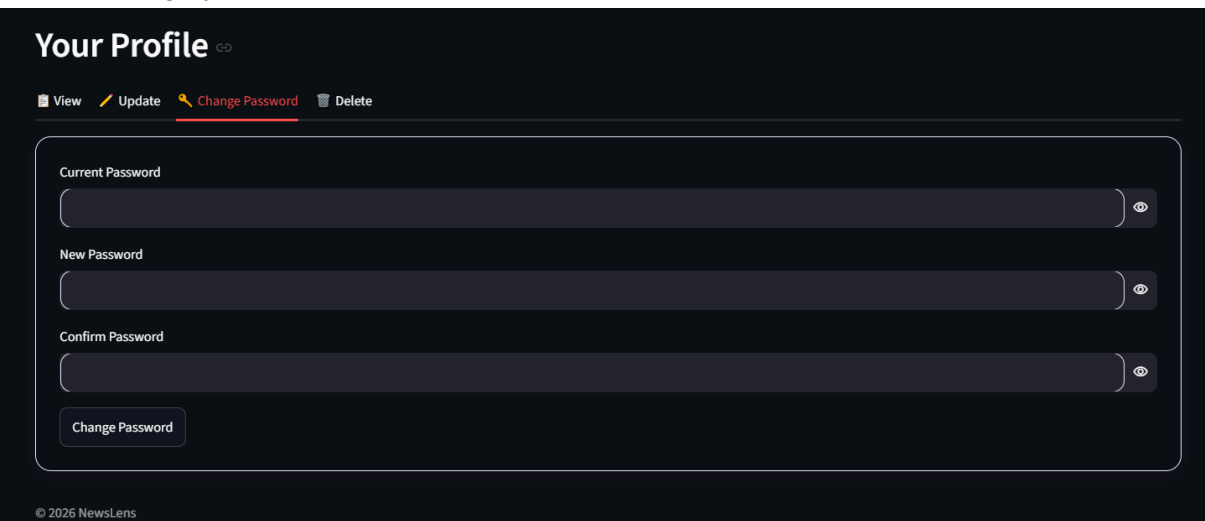

Hit the profile page on left and you will be in your profile section you can modify as you want

- Change your name update your name
- Update your email

- Change your password

- Or delete your account
- Every change will be in real time

IMPORTANT: The backend must be woken up before you can use the application. Once you see the confirmation that the backend is active, NewsLens AI is fully operational and ready for your use.
